Annual growth rates are adjusted to exclude the effects of population changes, data revisions, write-offs and sales/purchases of loan books, to reflect underlying business trends where appropriate and are based on non-seasonally adjusted.

Year-on-year percentage changes compare the latest month's figure with the same month's figure in the previous year.

Please note data on UK cardholders is separate to data on card activity in the UK. Data on UK cardholders refers to transactions on cards issued to UK residents, both overseas and inside the UK. Data on card activity in the UK refers to transactions in the UK only, but on both UK-issued cards and cards issued overseas this data is provided by acquirers.

We estimate data covers over 97 per cent of the total credit card market.

Active accounts are defined as those with balances outstanding at the end of the calendar month.

(a) Please note this figure refers to the percentage of total credit card balances outstanding that incurred interest at the end of the month i.e. excluding spending in the interest-free period or with balances on a zero per cent rate.

The monthly credit card data has been re-stated back to January 2019 to increase our market coverage to 97 per cent providing a more representative picture of the credit card market.

Debit card transactions outside the UK include foreign POS transactions as well as online purchases and subscriptions acquired outside the UK. No further breakdown of this data is available to identify the split between foreign transactions and UK transactions acquired outside the UK.

Data series are subject to restatement, based on corrections or the receipt of additional information.

The contactless limit on credit and debit cards was raised to £30 in September 2015, £45 in April 2020 and £100 in mid-October 2021.
